Mobile Telephones & Video Images

The Association is becoming increasingly concerned about the new wave of **mobile telephones with a photographic capability** of both static and moving images. In the right hands they are, nothing more than an opportunity to have fun with friends and family, by capturing images and mailing them within your circle of friends. However like many new things, camera phones need to be used responsibly and children in particular need to be careful they don't misuse them or allow others to exploit them in any way. Used responsibly, such devices are perfectly safe, but sharing images widely may betray a confidence or even an identity and such information may help those who might want to harm children. The use of such equipment is difficult to control but we can all be vigilant and **if you have any concerns in this area, please bring them to our attention**- either direct or through your team managers.
